

UNBIAS AUTOMATION ADVICE

If you have a need for automation, where do you turn for "non-salesy" advice to find the best solution?

How It Can Help:

- Personalize evaluation of your situation and needed
- Real life automation options to consider
- Advances in automation you need to know about
- Products to consider and a plan on how to implement
- Connecting you to vendors and experts to get the job done

Detail Description:

Quinton Christensen, a staff engineer with the University of Utah, has been applying automation solutions for more than a decade with many companies. He currently manages the robotics and Mechatronics labs at the U of U.

How Much Does it Cost:

- Initial consultation and needs assessment is free
- Additional work based on scope of the project

What Can I Expect:

Get personalized advice on applying automation with Quinton Christensen, a staff engineer with the University of Utah.

How to Get Started:

- Contact the UU MEP Center at: info@utah-mep.org
